ANSALDO STS awarded two contracts for signalling in Italy

- Ansaldo STS has been awarded two contracts for a total value of EURO 74.8 million related to the signalling of the DD Rome – Florence route of the AC/AV Turin – Milan – Naples line

The scope of work of Ansaldo STS, in the contracts awarded by RFI (Italian Railway Network), is related to the design and construction of the Ground Subsystem ERTMS/ETCS Level 2, of the ACC-M, and of the complementary and accessory technological upgrade operations for the DD Rome – Florence route of the AC/AV Turin – Milan – Naples line.

Ansaldo STS supply the ACCM and ERTMS signalling systems, the Bushing Temperature Detection system, the Track Temperature Monitoring system, the power systems, the adjustment of the buildings and the telecommunication systems.

Ansaldo STS signalling systems will serve the current 234 km double track line elevating it to the highest technological levels.

Ansaldo STS is proud to give once again its support and commitment to RFI for the renovation of Italian railway systems.
