In addition to higher revenues, this was due to recording earnings related to receivables that were recorded as gains on sale up through March 31, 2010 in line with the consolidation of securitization entities from April 1, 2010, based on new U.S. GAAP accounting standards. The improvement also reflected reduced financing costs at Hitachi Capital Corporation.

(3) Revenues by Market

Revenues in Japan in the third quarter of fiscal 2010 were 1,259.9 billion yen, up 2% year over year. One reason was higher revenues in the Digital Media & Consumer Products Segments driven by the impact of the eco-points system and a summer heatwave in Japan. The result also reflected higher revenues mainly in the High Functional Materials & Components, Automotive Systems, and Social Infrastructure & Industrial Systems segments in line with recovering demand in the electronics- and automotive-related fields, among other factors.

Outside Japan revenues increased 8%, to 1,003.5 billion yen. In addition to higher sales in the Construction Machinery Segment, mainly to emerging countries, the Electronic Systems & Equipment, High Functional Materials & Components, Components & Devices and Automotive Systems segments posted strong revenue growth because of recovering demand in the electronics- and automotive-related fields.

As a result, the ratio of overseas revenues to consolidated revenues increased 1 point year over year to 44%.

For the first nine months of fiscal 2010, revenues in Japan increased 4% year over year, to 3,783.5 billion yen. Overseas revenues increased 13%, to 2,982.3 billion yen.

(4) Capital Investment, Depreciation and R&D Expenditures

Capital investment on a completion basis, excluding leasing assets, increased 34% year over year, to 69.1 billion yen, primarily due to investments for boosting production to meet recovering demand.

Depreciation, excluding leasing assets, decreased 16% year over year, to 74.4 billion yen, primarily due to the strict selection of capital investments through the previous quarter.

R&D expenditures increased 6% year over year, to 95.5 billion yen, which corresponded to 4.2% of consolidated revenues. The increase was due mainly to further R&D investment to strengthen the Social Innovation Business.

For the first nine months of fiscal 2010, capital investments on a completion basis, excluding leasing assets, increased 6%, to 189.4 billion yen. Depreciation, excluding leasing assets, declined 16%, to 224.7 billion yen. R&D expenditures were up 8% at 290.4 billion yen, corresponding to 4.3% of consolidated revenues.

Total assets as of December 31, 2010 increased 340.7 billion yen from March 31, 2010, to 9,305.2 billion yen. This resulted from the recording of financial assets that had been transferred off the balance sheet to securitization entities in accordance with the application of new U.S. GAAP accounting standards effective April 1, 2010. Similarly, interest-bearing liabilities increased by 457.1 billion yen, to 2,824.3 billion yen due to the recording of liabilities associated with the consolidation of securitization entities. Stockholders' equity increased 165.0 billion yen, to 1,449.6 billion yen from March 31, 2010 due mainly to the improvement in net income attributable to Hitachi, Ltd. As a result, the total Hitachi, Ltd. stockholders' equity ratio was 15.6%. The debt-to-equity ratio, including noncontrolling interests, was 1.15. Excluding the impact of adopting new accounting standards, the debt-to-equity ratio, including noncontrolling interests,

(2) Cash Flows

	Three month	s ended Decem	ıber 31, 2010	Nine months ended December 31, 2010			
	Yen (billions)	Year-over-year change	U.S. dollars (millions)	Yen (billions)	Year-over-year change	U.S. dollars (millions)	
Cash flows from operating activities	42.0	(12.5)	520	419.6	32.4	5,181	
Cash flows from investing activities	(49.0)	39.3	(605)	(154.6)	189.6	(1,909)	
Free cash flows	(6.9)	26.8	(86)	264.9	222.0	3,271	
Cash flows from financing activities	(65.3)	(207.2)	(806)	(259.2)	(135.6)	(3,200)	

Operating activities in the third quarter of fiscal 2010 provided net cash of 42.0 billion yen, a year-over-year decrease of 12.5 billion yen, due mainly to an increase in inventories to be sold at the end of the fiscal year. This year over year decrease was despite a marked improvement in net income.

Investing activities used net cash of 49.0 billion yen, 39.3 billion yen less year over year, mainly due to the strict selection of capital expenditures.

Free cash flows, the sum of cash flows from operating and investing activities, was a negative figure of 6.9 billion yen.

Financing activities used net cash of 65.3 billion yen due to the progress in debt repayment and increased dividend payments.

The net result of the above items was a decrease of 77.1 billion yen in cash and cash equivalents, to 556.6 billion yen.

For the first nine months of fiscal 2010, operating activities provided net cash of 419.6 billion yen, an increase of 32.4 billion yen year over year. This reflected a marked improvement in net income.

Investing activities during the same period used net cash of 154.6 billion yen, 189.6 billion yen less year over year. This decrease was attributable to the strict selection of investments, including the acquisition of property, plant and equipment, and shares. It also reflected the selling of certain shareholdings.

Free cash flows, the sum of cash flows from operating and investing activities, was 264.9 billion yen, a 222.0 billion yen improvement year over year.

Financing activities used net cash of 259.2 billion yen, 135.6 billion yen more than the corresponding nine-month period of the previous fiscal year. In addition to the repayment of debt, this was due to higher dividend payments.

Free cash flows increased in both the three- and nine-month periods due to the consolidation of securitization entities in accordance with the application of new U.S. GAAP accounting standards effective from April 1, 2010. However, the application of these standards had almost the same effect on cash outflows in financing activities.

3. Outlook for Fiscal 2010

	Year ending March 31, 2011					
	Yen (billions)	Year-over-year change (% or billions yen)	U.S. dollars (millions)			
Revenues	9,300.0	4%	116,250			
Operating income	440.0	237.8	5,500			
Income before income taxes	430.0	366.4	5,375			
Net Income	305.0	389.3	3,813			
Net Income attributable to Hitachi, Ltd.	230.0	336.9	2,875			

Note: All fiscal 2010 outlook figures were converted using 80 yen to the U.S. dollar.

The above forecasts for fiscal 2010 are based on a steady contribution from the Social Innovation Business, accelerated global expansion, the benefits of business structure reforms, and progress with ongoing cost-containment initiatives on procurement costs and fixed expenses. The forecast also takes into account the uncertainty surrounding the global economic outlook and expected impact of the yen's appreciation.

Hitachi is forecasting overall revenues in line with its previous projections. The Company expects to see higher revenues than its previous forecast announced on October 28, 2010 in the Automotive Systems, Digital Media & Consumer Products, Social Infrastructure & Industrial Systems, and Components & Devices segments. This is due to recovering demand in the electronics- and automotive-related fields, as well as the benefits of economic stimulus measures around the world, among other factors. However, Hitachi also expects lower revenues in the Power Systems segment, where some projects have been pushed back, as well as the High Functional Materials & Components segment.

Hitachi has raised its projection for operating income from its previous forecast. The revised projection is based mainly on improved earnings in the Digital Media & Consumer Products, Components & Devices and Social Infrastructure & Industrial Systems segments due to stepped-up cost-cutting activities, including fixed expenses. Accompanied with an improvement in net other deductions, Hitachi has also raised its forecasts for income before income taxes, net income and net income attributable to Hitachi, Ltd.

Hitachi is assuming exchange rates of 80 yen to the U.S. dollar and 110 yen to the euro for the fourth quarter of fiscal 2010.

Factors that could cause actual results to differ materially from those projected or implied in any "forward-looking statement" and from historical trends include, but are not limited to:

- economic conditions, including consumer spending and plant and equipment investments in Hitachi's major markets, particularly Japan, Asia, the United States and Europe, as well as levels of demand in the major industrial sectors which Hitachi serves, including, without limitation, the information, electronics, automotive, construction and financial sectors;
- exchange rate fluctuations for the yen and other currencies in which Hitachi makes significant sales or in which Hitachi's assets and liabilities are denominated, particularly against the U.S. dollar and the euro;
- uncertainty as to Hitachi's ability to access, or access on favorable terms, liquidity or long-term financing;
- uncertainty as to general market price levels for equity securities in Japan, declines in which may require Hitachi to write down equity securities that it holds;
- the potential for significant losses on Hitachi's investments in equity method affiliates;
- increased commoditization of information technology products and digital media-related products and intensifying price competition for such products, particularly in the Components & Devices and the Digital Media & Consumer Products segments;
- uncertainty as to Hitachi's ability to continue to develop and market products that incorporate new technology on a timely and cost-effective basis and to achieve market acceptance for such products;
- rapid technological innovation;
- the possibility of cost fluctuations during the lifetime of or cancellation of long-term contracts, for which Hitachi uses the percentage-of-completion method to recognize revenue from sales;
- fluctuations in the price of raw materials including, without limitation, petroleum and other materials, such as copper, steel, aluminum and synthetic resins and shortages of materials, parts and components;
- fluctuations in product demand and industry capacity;
- uncertainty as to Hitachi's ability to implement measures to reduce the potential negative impact of fluctuations in product demand, exchange rates and/or price of raw materials and shortages of materials, parts and components;

- uncertainty as to Hitachi's ability to achieve the anticipated benefits of its strategy to strengthen its Social Innovation Business;
- uncertainty as to the success of restructuring efforts to improve management efficiency by divesting or otherwise exiting underperforming businesses and to strengthen competitiveness and other cost reduction measures;
- general socio-economic and political conditions and the regulatory and trade environment of countries where Hitachi conducts business, particularly Japan, Asia, the United States and Europe, including, without limitation, direct or indirect restrictions by other nations on imports, or differences in commercial and business customs including, without limitation, contract terms and conditions and labor relations;
- uncertainty as to the success of alliances upon which Hitachi depends, some of which Hitachi may not control, with other corporations in the design and development of certain key products;
- uncertainty as to Hitachi's access to, or ability to protect, certain intellectual property rights, particularly those related to electronics and data processing technologies;
- uncertainty as to the outcome of litigation, regulatory investigations and other legal proceedings of which the Company, its subsidiaries or its equity method affiliates have become or may become parties;
- the possibility of incurring expenses resulting from any defects in products or services of Hitachi;
- the possibility of disruption of Hitachi's operations in Japan by earthquakes or other natural disasters;
- uncertainty as to Hitachi's ability to maintain the integrity of its information systems, as well as Hitachi's ability to protect its confidential information and that of its customers;
- uncertainty as to the accuracy of key assumptions Hitachi uses to valuate its significant employee benefit related costs; and
- uncertainty as to Hitachi's ability to attract and retain skilled personnel.

The factors listed above are not all-inclusive and are in addition to other factors contained in Hitachi's periodic filings with the U.S. Securities and Exchange Commission and in other materials published by Hitachi.
