FOR IMMEDIATE RELEASE

Hitachi Automotive Systems' mono tube shock absorber used on minor change models of Toyota's Lexus IS series

Tokyo, December 7, 2016 --- Hitachi Automotive Systems, Ltd. today announced that its automotive mono tube shock absorber is being used on all models of Toyota Motor Corporation's Lexus IS series which were released in October, 2016 as minor change models.

The mono tube shock absorber is a principal component of a suspension system that provides outstanding responsiveness.

The minor changes to the IS series focus on Toyota's attention to detail, such as the tuning of the suspension, advancing the pleasure of driving, which can be considered the DNA of the Lexus IS series, and on further improving the level of comfort.

Looking to the future, Hitachi Automotive Systems will continue to develop products and systems that improve the environmental friendliness, safety, comfort and convenience of vehicles to create new value for people, vehicles, and society.
